CLIMATE CONTROL

WEEKLY WALL-MOUNTING WI-FI CHRONOTHERMOSTATS

- Automatic programming on a weekly basis with 3 temperature levels T1, T2, T3
- On/off temperature regulation type (with adjustable differential) or proportional
- Antifreeze temperature to prevent system freezing when the device is switched off
- Configurable backlighting display: always off, of a colour chosen among 48 possible shades or variable between red, green and blue based on the difference between the measured temperature and the set one (in the Lite version only blue backlit)
- Display of the measured humidity value (not available in the Lite version)
- Timing function: allows you to extend the current operation for the specified period (hours or days), after which the device changes operation from automatic to off, from manual to automatic, from off to on (manual or automatic)
- Delay function (settable for each hour independently): allows to adjust the temperature for the first 15, 30 or 45 minutes of the current time on the basis of the temperature level set for the previous hour
- “Local operation block” function: allows the device control only with the app (keypad changes are ignored)
- Possibility to reduce the settable temperature range (factory 2÷50°C)
- Automatic summer time change and automatic synchronization when connected to the electricity network
- Keypad lock with password to prevent changes by unauthorized persons
- Classification according to point 6 of the Communication 2014 /C 207/02 of the European Commission: class IV
