# Flush-mounting smart thermostat with wi-fi technology

DAFNE WI-FI is not just a chronothermostat.  
*It is a SMART chronothermostat.*

White/anthracite gray colors

The device can be totally managed remotely using our free updated "CLIMA WI-FI" application

Available on both iOS and Android.

Function to manage the device completely from the smartphone via application. Ideal for installation in public places, hotels, B&B - where no local modification are needed.

## Our new solution *for a smart home*

If there is a protracted absence of Wi-Fi connectivity it can be used in local mode. This is useful in case of router replacement or breakage.

Weekly programming

3 temperature levels in automatic mode + 1 temperature in manual mode + 1 safety anti-freeze temperature

Keypad with 4 key for settings and functionality regulation

LCD display with blue backlight that can be deactivated with a button

Keypad lock function with password, useful for installation in public places

Automatic reactivation of full functionality even after a prolonged blackout period

Compatibility with the main home switching programs

## DAFNE WI-FI SMART CHOICE

OUR EVOLUTION OF THE FLUSH MOUNTING SMART THERMOSTAT
